JERSEY GOVERNMENT AWARDS BOUYGUES CONSTRUCTION A CONTRACT FOR NEW OVERDALE ACUTE HOSPITAL

Bouygues Construction, through its subsidiary Bouygues UK, has been awarded the contract to build Overdale Acute Hospital in Jersey, in the Channel Islands. The hospital is the cornerstone of the Government of Jersey's New Healthcare Facilities Programme (NHFP).

@NHFP

Bouygues UK was designated as the preferred bidder by the Government of Jersey in November 2025. Over the following seven months, the company worked with the NHFP teams to finalise the commercial agreements, review technical specifications and prepare for the works to begin. Construction will begin later this year as development plans draw to a close, and the new facility is scheduled to open in 2030.

The Overdale Acute Hospital, covering a total area of 47,500 m², will include an Emergency Department, six operating theatres, inpatient beds, intensive care beds and a mother and baby unit. The project's environmental impact will also be a top priority, with a focus on

optimised design, energy efficiency and low-carbon materials, as well as a biodiversity net gain of more than 10 %.

One of the project's main challenges will be addressing the specific logistical considerations linked to a large, complex scheme, as well as accommodating the estimated 800 people working on site at peak times.

Philippe Bernard, Chair and CEO of Bouygues UK, said: "We are excited to deliver this transformational project for Jersey. The partnership with the Government of Jersey and the NHFP team to reach this point has been extremely collaborative and productive, and we look forward to working together to deliver exceptional value, support local employment and supply chain partners, and create lasting social benefits for the community throughout construction and beyond. As Lead Contractor, we are committed to bringing our healthcare expertise and project management capabilities to ensure the successful delivery of this vital facility for Jersey."

Minister for Health and Social Services, Senator Tom Binet, said: "We are pleased to have reached this significant milestone in concluding the procurement process for the Acute Hospital and signing the Main Works Contract with Bouygues UK. We look forward to building on the good progress made so far and continuing our collaboration with Bouygues UK to deliver this important health facility for Islanders."

Bouygues Construction further strengthens its position as a leading global player in the healthcare sector, leveraging its expertise in the design, construction and refurbishment of healthcare facilities. In the past ten years, the company has completed more than 300 healthcare facilities, including the Trousseau University Hospital in Tours and the new mother and baby unit at Rennes University Hospital, both in France, the Moorfields and UCL Centre for Eye Health and the Proton Beam Therapy Centre, both in the UK, the Mohammed VI International University Hospital in Morocco, and the Ryde Hospital Redevelopment in Australia.

ABOUT BOUYGUES CONSTRUCTION

Bouygues Construction employs 34,500 people around the world, all driven by the greatest and most exciting responsibility of all - building for life. In more than 50 countries, we improve daily life for millions of people by creating structures and buildings that serve life and address all our needs: shelter, healthcare, education, work, entertainment, travel, access to low-carbon energy, etc. At every stage of a project, we put all our expertise and our experience into designing, renovating and building differently so that we can meet the critical imperatives of the environmental transition and achieve construction that is sustainable and less resource-intensive. Every day, we make sure that everyone is safe, and that human rights and ethical standards are respected. Committed to strong values, the men and women of Bouygues Construction work passionately alongside their customers and partners so that our footprint becomes ever more positive. In 2025, Bouygues Construction generated sales of €10.6 billion.
