BOUYGUES CONSTRUCTION CONTINUES THE MODERNISATION OF YOPOUGON UNIVERSITY HOSPITAL, ONE OF IVORY COAST'S LARGEST MEDICAL FACILITIES

SETAO, a subsidiary of Bouygues Construction, has been commissioned by the Ivory Coast Ministry of Health, Public Hygiene and Universal Health Cover to restructure, refurbish and equip Yopougon University Hospital in Abidjan. The works have been divided into two phases, the second of which began in the summer of 2026 at a cost of €95 million.

Launch of the second phase of an extensive refurbishment programme

This refurbishment project aims to bring one of the leading hospitals in western Abidjan up to the highest possible medical standards through a complete reorganisation of the hospital and its technical facilities. The initial phase of refurbishment, carried out in 2023 by SETAO, the historical subsidiary of Bouygues Construction in Ivory Coast, has already seen the renovation of the hospital's critical facilities, such as operating theatres, the A&E department, the intensive care unit and some of the patient wards.

Phase 2, which was launched in July 2026, will complete the restructuring and refurbishment of the hospital, including new operating theatres, a pharmacy, laboratories and consulting rooms. The kitchens and all the remaining inpatient wards will also undergo refurbishment.

No interruption to patient care

Work on this second phase will proceed while the site remains in operation, which requires a strict separation of construction and clinical activities, as well as constant vigilance with regard to both safety and the availability of critical equipment. The project is on a tight 21-month schedule, with early handover planned for the priority facilities: medical imaging and inpatient rooms. Once completed, the hospital will have 509 beds and its surgical facilities will be expanded from six to 12 operating theatres. In addition to the equipment installed during Phase 1, it will also be equipped with an MRI scanner, two CT scanners and 12 ultrasound scanners.

A long tradition of healthcare expertise in Ivory Coast

Bouygues Construction, which was involved in building the Yopougon University Hospital (opened in 1990), is now carrying out the refurbishment and modernisation of this facility, eagerly awaited by healthcare professionals and the two million residents of one of the country's most populated municipalities. This renewed trust highlights the Group's expertise across the entire lifecycle of hospital infrastructure (design, construction and refurbishment) and consolidates its position as a global leader in the healthcare sector.

Philippe Jouy, Deputy CEO of Bouygues Construction with responsibility for Bouygues Bâtiment International, said: "Yopougon University Hospital is a striking example of what makes our healthcare expertise so strong: our ability to deliver complex hospital projects to the high standards of rigour, reliability and quality demanded by such essential facilities."

In the past ten years, the Group has completed more than 300 healthcare facilities around the world, including Argenteuil hospital near Paris, the Trousseau University Hospital in Tours, France, and the Proton Beam Therapy Centre in London, as well as the Calavi International Hospital in Benin and the Mohammed VI International University Hospital Complex in Rabat, Morocco. Bouygues Construction is currently building the Moorfields and UCL Centre for Eye Health in London, and has also just been selected, through its subsidiary Bouygues UK, to build the new Overdale hospital in Jersey (in the Channel Islands).

ABOUT BOUYGUES CONSTRUCTION

Bouygues Construction employs 34,500 people around the world, all driven by the greatest and most exciting responsibility of all – building for life. In more than 50 countries, we improve daily life for millions of people by creating structures and buildings that serve life and address all our needs: shelter, healthcare, education, work, entertainment, travel, access to low-carbon energy, etc. At every stage of a project, we put all our expertise and our experience into designing, renovating and building differently so that we can meet the critical imperatives of the environmental transition and achieve construction that is sustainable and less resource-intensive. Every day, we make sure that everyone is safe, and that human rights and ethical standards are respected. Committed to strong values, the men and women of Bouygues Construction work passionately alongside their customers

and partners so that our footprint becomes ever more positive. In 2025, Bouygues Construction generated sales of €10.6 billion.
