

Paris, 26 October 2016

## Bouygues press release

**The Bouygues group is recognised for its action in favour of the climate  
and is added to CDP's "Climate A List"**

**On 25 October, the Bouygues group was added to CDP's Climate A List. This list includes all the companies taking part in the programme that obtained the best results following CDP's assessment and highlights the performance of their initiatives in favour of the climate.**

This result takes into account the investments and measures implemented by the Bouygues group to ensure the transition to a low-carbon economy. It rewards the efforts made to save energy and improve production processes as well as the internal procedures implemented in order to achieve greater energy efficiency. It also showcases the changes made to construction methods to make them more resource-efficient as well as the solutions proposed in terms of sustainable construction.

In 2016, 193 companies worldwide comprised the Climate A List, equating to 9% of all companies that responded to the request for assessment issued by 827 investors.

**Bouygues is now included in six different SRI (Socially Responsible Investment) indices:**

- Climate A List (CDP)
- Low Carbon 100 Europe
- MSCI World ESG Index
- MSCI ACWI ESG Index
- STOXX Global ESG Leaders
- Euronext Vigéo Eurozone 120

For more information, read about the Bouygues group's low-carbon solutions in the following blog [#BouyguesDD](#).

### About Bouygues

*Bouygues is a diversified industrial group with a strong corporate culture whose businesses are organised around three sectors of activity: Construction, with Bouygues Construction (building & civil works and energies & services), Bouygues Immobilier (property development) and Colas (roads); Telecoms, with Bouygues Telecom, and Media, with TF1. The Group was added to the CDLI index in 2015 with a score of 100 B.*

### About CDP

*CDP, formerly Carbon Disclosure Project, is an international, not-for-profit organization providing the global system for companies, cities, states and regions to measure, disclose, manage and share vital information on their environmental performance. More than 5,600 companies, representing close to 60% global market capitalization, disclosed environmental information through CDP in 2015. CDP now holds the most comprehensive collection globally of primary corporate environmental data and puts these insights at the heart of strategic business, investment and policy decisions.*
