BOUYGUES CONSTRUCTION TO BUILD THE NEW TROUSSEAU HOSPITAL FOR THE TOURS REGIONAL UNIVERSITY TEACHING HOSPITAL

- A SINGLE HOSPITAL OPERATING IN TWO BUILDINGS WITH A TOTAL SURFACE AREA OF 80 000 M²
- CENTRALISATION OF DEPARTMENTS FOR MORE EFFICIENT MEDICAL CARE AND IMPROVED COORDINATION
- WORKS WORTH A TOTAL OF €241 MILLION (CONSORTIUM) WILL BE COMPLETED IN 4 YEARS

Bouygues Construction has signed a contract for works of the New Trousseau Hospital, a project that will restructure the healthcare offer and improve patient care. The value of the contract for this hospital in the heart of the Tours agglomeration in central France is €241 million (Bouygues Construction's share: €150 million).

The new 80,000 m² hospital complex designed by AIA Architectes will provide around 600 beds. With 25 operating theatres and 13 treatment rooms, the hospital will expand its surgical capacities, offering more efficient patient care while bringing together a number of departments of the Tours Regional University Teaching Hospital currently spread over several facilities in the Tours agglomeration.

The project consists of the construction of two closely linked buildings on the site of the Trousseau Hospital. This initiative demonstrates the Regional University Teaching Hospital's desire to confirm its operational excellence in treating patients and supporting research and teaching in healthcare.

The New Trousseau Hospital will comprise:

- the main building, on four levels, housing the accident and emergency department, orthopaedic consultations, a large imaging platform, a forensic institute, operating theatres and treatment rooms and the hospital sterilisation facility, as well as intensive care units;
- a second four-storey building containing inpatient wards, outpatient treatment departments, ophthalmology consultations and a laboratory zone;
- an entrance hall connecting both buildings, with an admissions desk,
- a basement providing car-parking space.

The contract for the New Trousseau Hospital will be carried out by a consortium formed by two subsidiaries of Bouygues Construction (Bouygues Bâtiment Centre Sud-Ouest and Bouygues Bâtiment Grand Ouest), Equans Axima, Eiffage Énergie Systèmes and Cegelec Val-de-Loire.

Works on the project, which is due for completion in late 2027, will employ up to 450 people at peak times, with a strong commitment to local employment and integration of local and disadvantaged people. The worksite was organized to ensure continuity of care at the nearby Tours Regional University Teaching Hospital.

Bouygues Construction is active in the healthcare sector, seeking to improve healthcare provision in France and in other countries. The Group is currently working on the Abomey-Calavi university Hospital in Benin, Argenteuil Hospital near Paris, the Moorfields Eye Hospital in London, one of the world's most modern centres for ophthalmology, the Hospital Authority Supporting Services Center in Hong Kong and the Benguerir Hospital in Morocco.

About Bouygues Construction

With 32,400 employees working in 60 countries, Bouygues Construction designs, builds and rehabilitates the infrastructures and buildings that are essential for a sustainable society. All over the world, the Group's teams support the development of low-carbon energy production and public transport infrastructures and provide their expertise in the design, construction and renovation of buildings and neighbourhoods essential to life (health, education, work, tourism, leisure, public services, defence, etc.). The teams' commitment is based on three top priorities: safety culture, respect for human rights and ethics. In 2022, Bouygues Construction generated sales of €9.3 billion (excluding Energies & Services businesses, transferred to Equans in January 2023).
