

Equans Group Achieves validation by Science Based Targets initiative (SBTi) of its Near-Term Emissions Reduction Targets

Equans Group is proud to announce that the Science Based Targets initiative (SBTi) has officially validated its near-term greenhouse gas (GHG) emissions reduction targets, confirming their alignment with SBTi's rigorous Criteria and Recommendations.

The SBTi has classified Equans' targets ambition as consistent with the 1.5°C trajectory outlined in the Paris Agreement. This milestone underscores Equans' commitment to global sustainability and its ambition to lead the energy, digital, and industrial transitions toward a low-carbon and more resilient world.

This target include Scope 1 and 2 and 3 commitments toward SBTi requirements.

Driving Sustainability Through Expertise and Innovation

Equans' mission is to support enhance energy, digital, and industrial transitions by delivering innovative and effective solutions to reduce carbon footprints. With this commitment validation, the company express its own ambition to global operational excellence, in phase with its capacity to support clients, suppliers and stakeholders in the shift toward a sustainable, resilient, and low-carbon world.

“ This achievement reflects the dedication of our teams and partners and our determination to play a leading role in the energy transition, building solutions to save energy and switch to electricity and contribute to its decarbonisation. We look forward to continuing to support our clients and stakeholders in succeeding together in accelerating decarbonisation to provide them safe, sustainable, and performance solutions” said Jérôme Stubler, CEO of Equans.

About Equans

Equans, a subsidiary of the Bouygues group, is a global leader in the energy and services sector with operations in 20 countries, 90,000 employees working on 5 continents and a turnover of 18.8 billion euros in 2023.

Equans designs, installs and supplies tailor-made solutions to improve its customers' equipment, systems and technical processes and optimise their use in support of their energy, industrial and digital transitions. Thanks to a strong local footprint based on its historic local brands and excellent technical expertise, Equans' highly qualified experts are capable of supporting regions, cities, industries and buildings in the fields of HVAC (Heating, Ventilation and Air Conditioning), Refrigeration and Fire Safety, Facility Management, Digital and ICT, Electricity, Mechanics and Robotics. Equans is the leader in the main European markets (France, Switzerland, Belgium, the Netherlands and the United Kingdom) and is also well-positioned in the United States and Latin America.
